

# Credit Check

Convenient access to extensive bureau datasets, get credit reports and much more.

Experian Credit Check is an online platform facilitating access to credit bureau data for the purposes of performing a credit bureau enquiry, on a natural person, and returning the resultant credit report.

Credit Check offers a comprehensive range of functionalities and provides subscribers with access to the most up-to-date credit bureau information about individuals.

Bureau subscribers can access such data for a variety of prescribed purpose as per the regulations, including the performance of affordability assessments.

Credit Check caters for both credit and non-credit providers, to allow equally beneficial access to our data. Credit check gives you access to credit enquiries on consumer data in the form of credit reports.

## How it Works

- Credit Check is accessed through a user-friendly web interface.
- Credit reports, account and behaviour data, contactability information and positive/negative information on consumers can be obtained in real-time.
- The service allows you to effectively perform the necessary affordability studies and is constantly reviewed to take changes in credit legislation into consideration.

**Take control of your credit agreement and loan management processes by contacting one of our knowledgeable consultants at [ls.info@experian.com](mailto:ls.info@experian.com).**

**Built on the latest HTML5 technology. Secure with HTTPS format where all communications between your browser and the Credit Check system are encrypted.**
